Diagnostics waiting over six weeks

Provider distribution and trajectory signals · data through September 2026

The latest release has been incorporated into the provider screen. 142 providers can be assessed across six consecutive releases. Favourable signals outnumber adverse signals, 52 to 42.

Provider distribution

Latest reported performance across providers. This shows current levels; it is separate from whether a provider has improved or deteriorated relative to its own trajectory.

Moderate = 1–<2×; marked = at least 2× the metric-specific materiality threshold.

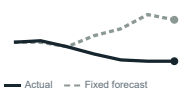

Trajectory watch

Each provider's six actual months are compared with one forecast path fixed before that window. Both lines begin at the same observed value. The displayed gap is the latest actual minus the fixed forecast for that same month. A low performer can therefore be improving, while a high performer can be deteriorating. Status: Actual performance is compared with the monthly path forecast six months earlier. The displayed figure is the latest actual minus the fixed forecast for that same month; the six-month window checks persistence.

142	52	42	48
providers assessed	sustained favourable	sustained adverse	without an active signal

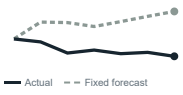

Largest sustained favourable moves

Mid Yorkshire Teaching NHS Trust
Latest 3.5% · 6 months compared with a path fixed six months earlier
Forecast fixed before the six-month window

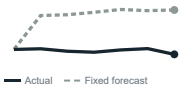

41.2pp
LATEST MONTH: BELOW FORECAST

The Hillingdon Hospitals NHS Foundation Trust
Latest 9.0% · 6 months compared with a path fixed six months earlier
Forecast fixed before the six-month window

32.3pp
LATEST MONTH: BELOW FORECAST

King's College Hospital NHS Foundation Trust
Latest 16.6% · 6 months compared with a path fixed six months earlier
Forecast fixed before the six-month window

25.6pp
LATEST MONTH: BELOW FORECAST

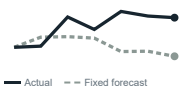

Largest sustained adverse moves

Royal Papworth Hospital NHS Foundation Trust
Latest 63.6% · 6 months compared with a path fixed six months earlier
Forecast fixed before the six-month window

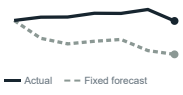

46.0pp
LATEST MONTH: ABOVE FORECAST

Midlands Partnership University NHS Foundation Trust
Latest 37.6% · 6 months compared with a path fixed six months earlier
Forecast fixed before the six-month window

24.6pp
LATEST MONTH: ABOVE FORECAST

Dorset Healthcare University NHS Foundation Trust
Latest 27.4% · 6 months compared with a path fixed six months earlier
Forecast fixed before the six-month window

20.0pp
LATEST MONTH: ABOVE FORECAST

Trajectory-watch rule. Six actual months are compared with one path forecast before the six-month window. The sparkline begins at the shared observed starting value, then shows how actual performance diverged from that fixed path. The displayed gap is the latest actual minus the fixed forecast for that same month. A signal requires a material latest-month gap and at least five of six months in that direction. These are screening prompts—not league tables, causal estimates or judgements of provider quality.

Reference: 14% or less by March 2027.
