Recent performance and current release

The vertical band is the 80% expected range.

Longer-term outlook and milestones

Descriptive projection; not forced to meet targets.

Benchmark: 85% constitutional standard. 6.6pp below milestone
Data: NHS England cancer waiting times. **Targets:** Medium Term Planning Framework interim target · Medium Term Planning Framework final target
Method: Backtest-weighted ensemble of current-level seasonal movement, damped annual drift and a damped recent seasonal trend; at least 2 components are required. The final fit uses 53 consecutive months. Accuracy is tested on 24 rolling one-month-ahead forecasts. The 80% range uses empirical historical error quantiles from 24 forecast errors. Weights use inverse rolling RMSE and are shrunk toward equal weights. The pre-release commentary compares the current-level seasonal component with the combined forecast. Provider distribution and trajectory watch are shown on page 2.

Distribution and trajectory watch · July 2026

Provider distribution

Latest reported performance across providers. This is a comparison of current levels, not a measure of whether each provider is improving or deteriorating.

Trajectory watch

Signals show sustained departures from each provider's own archived outlook. A low performer can be improving, and a high performer can be deteriorating. Status: Actual performance is compared with the monthly path forecast six months earlier. The displayed figure is the average gap across those six months.

114 providers assessed	29 sustained favourable	25 sustained adverse	60 without an active signal
Largest sustained favourable moves		Largest sustained adverse moves	
NORTH CUMBRIA INTEGRATED CARE NHS FOUNDATION TRUST Latest 77.8% · 6 months compared with a path fixed six months earlier fixed six month path backtest 14.6pp AVERAGE GAP FROM FIXED PATH		EAST CHESHIRE NHS TRUST Latest 59.2% · 6 months compared with a path fixed six months earlier fixed six month path backtest 9.3pp AVERAGE GAP FROM FIXED PATH	
CHELSEA AND WESTMINSTER HOSPITAL NHS FOUNDATION TRUST Latest 90.6% · 6 months compared with a path fixed six months earlier fixed six month path backtest 12.4pp AVERAGE GAP FROM FIXED PATH		SURREY AND SUSSEX HEALTHCARE NHS TRUST Latest 69.7% · 6 months compared with a path fixed six months earlier fixed six month path backtest 9.1pp AVERAGE GAP FROM FIXED PATH	
COUNTESS OF CHESTER HOSPITAL NHS FOUNDATION TRUST Latest 83.8% · 6 months compared with a path fixed six months earlier fixed six month path backtest 9.4pp AVERAGE GAP FROM FIXED PATH		BEDFORDSHIRE HOSPITALS NHS FOUNDATION TRUST Latest 61.4% · 6 months compared with a path fixed six months earlier fixed six month path backtest 8.2pp AVERAGE GAP FROM FIXED PATH	

Trajectory-watch rule. Six actual months are compared with the corresponding path fixed before the six-month window. A signal requires a material average gap, at least five of six months in the same direction, and the latest month confirming that direction. These are screening prompts—not league tables, causal estimates or judgements of provider quality.
