

Diagnostics waiting over six weeks

Provider distribution and trajectory signals · data through August 2026

The latest release has been incorporated into the provider screen. 142 providers can be assessed across six consecutive releases. Favourable signals outnumber adverse signals, 49 to 44.

Provider distribution

Latest reported performance across providers. This shows current levels; it is separate from whether a provider has improved or deteriorated relative to its own trajectory.

Trajectory watch

Signals show sustained departures from each provider's own archived outlook. A low performer can be improving, and a high performer can be deteriorating. The archive is still building; signal rows state whether they use archived release forecasts, a historical backtest, or both. Status: Actual performance is compared with the monthly path forecast six months earlier. The displayed figure is the average gap across those six months.

142 providers assessed	49 sustained favourable	44 sustained adverse	49 without an active signal
Largest sustained favourable moves		Largest sustained adverse moves	
West London NHS Trust Latest 64.8% · 6 months compared with a path fixed six months earlier fixed six month path backtest	35.3pp AVERAGE GAP FROM FIXED PATH	Royal Papworth Hospital NHS Foundation Trust Latest 59.4% · 6 months compared with a path fixed six months earlier fixed six month path backtest	34.9pp AVERAGE GAP FROM FIXED PATH
Royal Surrey NHS Foundation Trust Latest 12.1% · 6 months compared with a path fixed six months earlier fixed six month path backtest	31.5pp AVERAGE GAP FROM FIXED PATH	Dorset Healthcare University NHS Foundation Trust Latest 34.3% · 6 months compared with a path fixed six months earlier fixed six month path backtest	21.0pp AVERAGE GAP FROM FIXED PATH
King's College Hospital NHS Foundation Trust Latest 19.9% · 6 months compared with a path fixed six months earlier fixed six month path backtest	26.0pp AVERAGE GAP FROM FIXED PATH	East Kent Hospitals University NHS Foundation Trust Latest 52.0% · 6 months compared with a path fixed six months earlier fixed six month path backtest	19.9pp AVERAGE GAP FROM FIXED PATH
Trajectory-watch rule. Six consecutive release surprises are compared with forecasts made before each release. A signal requires a material average gap, at least five of six months in the same direction, and the latest month confirming that direction. These are screening prompts—not league tables, causal estimates or judgements of provider quality.			

Reference: 14% or less by March 2027.
